Associate Professor

Date: 30th June 2019

TO WHOM IT MAY CONCERN

It is my pleasure to write this letter of recommendation for **Meghna Roy Chowdhury**, currently a undergraduate student at the Electronics and Communication Engineering Department of Vellore Institute of Technology, India. Meghna worked as summer intern under my supervision at the CSE Department of IIT Kharagpur, from 15th May to 30th June 2019.

During her internship, Meghna primarily focused on the design and implementation of True Random Number Generator (TRNG) circuit on Field Programmable Gate Array (FPGA). Her work was part of a hardware based encryption/decryption platform that is currently being developed, and planned to be deployed in the CSE department of IIT Kharagpur.

Meghna has a consistently good academic record. During her internship, she gave an impression of being a fast learner and capable of working with minimal supervision, especially considering the relatively challenging nature of her internship problem. She is a team player, as she demonstrated by collaborating with several students when at IIT Kharagpur. I am confident that she would be able to fulfill and exceed your expectations in the position she is applying for.

Sincerely,

Rajat Subhra Chakraborty
